Reevaluation of standards and procedures of human-computer interaction in XR

Author: George Benos

Ph.D. Candidate

Supervisor: Dr. George Lepouras

Professor

Human Computer Interaction

HCI – The keyboard case

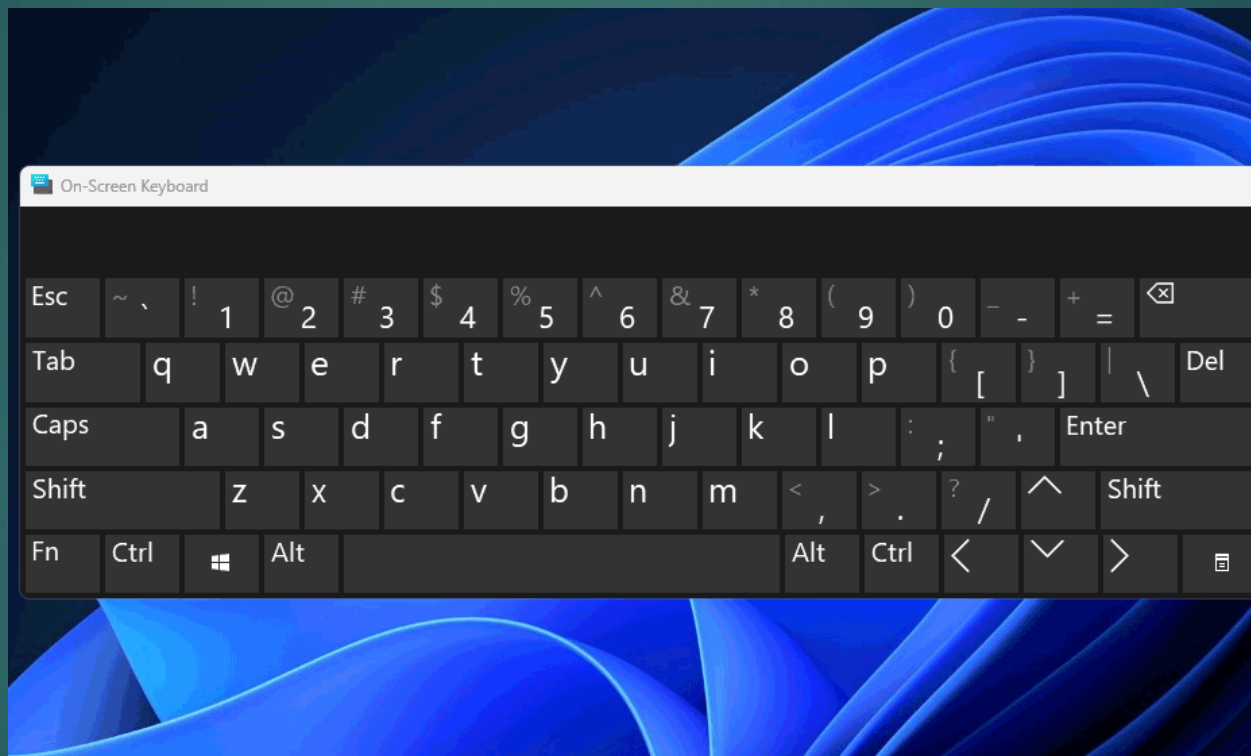

HCI – The keyboard case

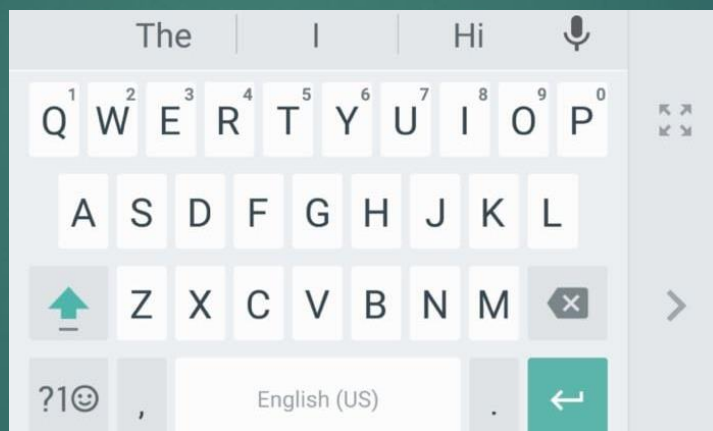

HCI – The keyboard case

HCI – The keyboard case

Main Objective

- ▶ Delve Deeper in the usability (and satisfaction) aspects of input methods in both XR and standard environments.
- ▶ Provide a comprehensive framework of the evaluation & comparison process.
 - ▶ Both in terms of software libraries and general guidelines.
- ▶ Outline common pitfalls and difficulties that are common to arise in the future, in similar attempts.

First Step

- ▶ Problem: What is the current “problem space”?
 - ▶ What are some common HCI methods?
 - ▶ What is their impact in the current systems?
 - ▶ Are they good candidates for XR systems?
- ▶ Solution: Cataloguing & Taxonomy
 - ▶ Mode of Interaction
 - ▶ Bowman HCI Taxonomy / Purpose taxonomy
 - ▶ Continuity (discreet / continuous/ freedom axes)

Input category	Input method	explanation
Discreet input – hands	"Qwerty" traditional keyboard	Alphanumeric input augmented with special functions
Discreet input – hands	Chord keyboard	Single hand press of multiple buttons translates to different characters
Continuous input – hands	SpaceBall	Linear motion and rotation in 3 integral dimensions (6 degrees of freedom) with a physical control object
Continuous input – hands	Electromagnetic/sonic tracker	Linear motion and rotation in 3 integral dimensions (6 degrees of freedom)
Continuous input – hands	Glove input devices	Measure the position of the user's fingers and translate it to gestures
Continuous input - full body	3d trackers	Measure the position & rotation of the user's different body parts and translate them to gestures.
Continuous input – Voice	Speech to text	The user's continuous speech patterns are translated to the equivalent alphanumeric input
Continuous input – Voice	Natural language recognition	Using AI models, recognize the user's inputs as demands and answer accordingly
And more...		

Next Steps
